

OKEZIE URUCHI

7 Asajon way, Sangotedo Lekki-Ajah Lagos State

Email: queenuruchi@gmail.com

Phone Number: +234 816 276 8201

A highly skilled and experienced Java Developer with 3 years of professional experience in developing, testing, and maintaining enterprise-level software applications. Proficient in Java, Spring, Spring boot, Hibernate, and SQL. Demonstrated strong impact in previous roles by delivering high-quality software solutions on time and within budget.

SKILLS

Spring Framework, RESTful API, Maven, React, Bootstrap, Agile Leadership, JavaScript, Multithreading, JDBC, HTML, Mockito Unit Testing, J-Unit, JSON, Hibernate, Swagger, CSS, Postman, Communication skills, SOLID, Spring MVC, CI/CD, SQL, Java Spring Security, Servlet, Spring Boot, MySQL, XML, Docker.

WORK EXPERIENCE

Decagon - Lagos, Nigeria - Software Engineer **March 2022 to Present**

- Collaborated with cross-functional teams to develop and maintain enterprise-level software applications using Java, Hibernate, and Spring Framework.
- Implemented Spring Boot microservices to improve system performance, scalability, and flexibility.
- Utilized JDBC and Servlets to interact with the database and handle requests and responses from the client side.
- Followed SOLID principles to write maintainable and scalable code.
- Used multithreading to improve system performance and responsiveness.
- Implemented Spring Security to secure sensitive data and prevent unauthorized access.
- Deployed applications using Docker to ensure consistency and reliability across different environments.
- Utilized Spring MVC to develop web applications for clients to interact with the software.
- Developed and tested APIs using Postman, JSON, and XML.
- Implemented Microservices architecture for better scalability and modularity.

Webdeves Technology - Software Engineer

January 2021 to February 2022

- Worked on the development of e-commerce applications using Java, Spring Framework, and MySQL.
- Designed and developed RESTful APIs for integration with third-party services.
- Conducted unit testing and integration testing to ensure the functionality and stability of software application.
- Worked collaboratively with other developers, designers, and stakeholders to ensure project deadlines were met.
- Troubleshoot and resolve software defects as needed.

Profix MGT- Software Engineer

February 2020 to January 2021

- Develop and maintain Java-based software applications using Spring Framework and JPA/ Hibernate.
- Conducted performance testing to identify and resolve bottlenecks.
- Collaborated with cross-functional teams to design and implement software solutions.
- Resolved software defects and provided technical support to end-users.
- Conducted code reviews to ensure adherence to coding standards and best practices.

PROJECT HIGHLIGHTS

- **Computer-Based Test Application:** An application used by over 600 candidates to sit for a computer-based assessment.

Technologies: Springboot, Spring Security, Rest APIs, Hibernate, PostgreSQL.

Link: www.serviceaol.com

- **Fund A Cause:** This is a crowdfunding application where people raise a cause and get donations from users.

Technologies: Springboot, Spring Data JPA, Hibernate, PostgreSQL, Material UI, OAuth 2, CI/CD, Docker.
